

This radio station does a great service for me and my family. Christian radio stations are a welcome alternative to the trashy stations that are allowed to remain on the air fined or not. One station in particular had one of the DJ's being taught how to masturbate! I say thank god for christian radio. It is safe to allow my children listen to because the message through the music and the DJ's is always positive and uplifting. It would be a disservice to all citizens in the area to take away something that we willingly support. This station is not being funded by government funded programs. They survive as a service to the people who support the work they do as a whole. I believe it would be a detriment. Many people flip the dial looking for something else, an alternative. Children and adults. Why should they be left with the likes of the Howard Sterns and the Tom Lykus's?
